salonflow.art

# Did you know the feeling?

A spreadsheet, dozens of salons, manually counted acceptances and the hope you haven't forgotten anything.

## HOW IT USED TO LOOK

A salon came in, you added a row to the spreadsheet. Wrote down the results. Counted. Or not — you'll do that later.

When's the deadline? I think next week. Or the one after.

When will the results be? And how long until they send the catalogue?

How many acceptances do I actually have? And awards? And how many countries have I competed in?

Which countries should I enter next so I don't unnecessarily repeat myself?

How much do I need for AFIAP? Or EFIAP? It was somewhere in the spreadsheet...

Do I meet the conditions for PSA Stars? In which division? And exactly how many?

How many GPU points do I have? And where do I even find that?

How many times have I entered this photo? I have to go through every row.

What was that photo called? And what did it look like? Did I write the name correctly?

I achieved AFIAP. Great. Wrote it in the spreadsheet. Moved on.

## WITH SALONFLOW

Enter a result and progress toward distinctions recalculates instantly. No spreadsheets.

The deadline is in your calendar. A notification arrives 5 days before and again the day before.

Milestones — results, catalogue, gallery — all recorded in one place.

Exact overview: 287 acceptances, 46 awards, 23 countries. Always current.

Filter "New countries only" shows salons where you don't have an acceptance yet.

Checklist: 23 acceptances missing, 3 countries, 2 artworks. Precisely. No counting.

PSA checklist goes through each division separately and suggests the most efficient path.

GPU points are added automatically with every result entered.

The photo has 7 acceptances. The app alerts you before you reach the limit of ten.

For every photo you see the image, salon history, certificates and medal photos.

You achieved AFIAP. The app knows first — and celebrates with you.

*"For years I was entering photographs into salons and recording results in a spreadsheet. Then I stopped — and wrote SalonFlow."*

SalonFlow author Zdeněk Dlouhý · AFIAP · QPSA · GPU Crown 2 · SalonFlow author

# What is SalonFlow

The only dedicated tool for photographers actively competing in international photo salons. Tracks results, calculates FIAP, PSA and GPU distinctions — and forgets nothing.

## WHO IS SALONFLOW FOR

- ✓ Photographers entering FIAP, PSA or GPU salons
- ✓ Those pursuing distinctions like AFIAP, EFIAP, QPSA or GPU Crown
- ✓ Photographers with dozens or hundreds of salons behind them
- ✓ Anyone who wants an overview not just of results, but of their whole career

## WHAT MAKES IT DIFFERENT

- ✓ No Excel or spreadsheet — everything calculated automatically
- ✓ Distinction calculations exactly match FIAP, PSA and GPU rules
- ✓ Data is stored locally on your device and always available
- ✓ One tool for iPhone, iPad, Mac and web
- ✓ From a photographer, for photographers

## KEY FEATURES

### Salon tracking

From wishlist through entry to closed archive. Every salon has its story and its time.

### Automatic calculations

FIAP distinctions (category A and Diamond), PSA (ROPA, Stars, Galaxy) and GPU Crown are always up to date.

### Competition photos

Tracks the lifetime of every photograph: how many times submitted, how many acceptances, when approaching the limit.

### Celebration moments

As soon as you achieve a distinction or win a medal, the app recognises it and celebrates with you.

### SalonFlow Light

Web version with an overview dashboard, public portfolio and sync with the iOS app.

# Features you won't find elsewhere

Each of these features was born from real competition photography experience and solves problems other tools ignore.

## Distinction calculations, always current

FIAP category A and Diamond, PSA ROPA, Stars and Galaxy, GPU Crown. Add a result and everything recalculates instantly. You never count manually or check the rules yourself.

[FIAP](#)[PSA](#)[GPU](#)

6 FIAP distinctions · 8 Diamond levels · 10 PSA ROPA distinctions · Stars · Galaxy · 5 Crown levels

## Find salons where you haven't been yet

FIAP requires acceptances from a certain number of countries. SalonFlow knows which countries you have acceptances from and shows only salons from countries where you're still missing. A practical tool for strategic planning.

[Filtr "Pouze nové země" — exkluzivní funkce SalonFlow](#)

## FIAP and PSA checklists: see exactly what's left

FIAP checklist tracks each artwork separately: acceptances, countries and whether it meets the per-work requirement. PSA checklist goes through eight Star Paths, each with its own star status and a suggestion for the most efficient certification.

## Competition photos: tracking the lifetime of every artwork

According to FIAP rules, every photograph can have a maximum of ten acceptances. The app tracks each artwork separately and alerts you from the eighth acceptance, before you break the limit.

**No other tool addresses this**

# Features that change the experience

Results are just numbers. SalonFlow turns them into a story — with context, emotion and a tool that works for you.

## Celebration Moments: the app celebrates with you

As soon as you achieve a distinction or win a medal, the app recognises it and launches a celebration. Confetti, fireworks, congratulation card — five different levels depending on the significance of the result.

## Deadlines right in your calendar

Entry deadlines, result dates and award dispatch dates are added directly to your calendar. A notification arrives five days before and again one day before the deadline, so you won't forget to enter.

## Data backup and public profile

Sync transfers your results to the web as a backup accessible from anywhere. If you wish, you can also create a public photographer profile at [salonflow.art](https://salonflow.art). Two functions in one connection.

[salonflow.art/portfolio](https://salonflow.art/portfolio) →

## Results ready to share

The app recognises you've achieved results and offers you a neat card summarising the salon — name, acceptance counts, awards and patronage organisations. Share it with one tap via AirDrop, Instagram Stories, messages or anywhere else.

## One ecosystem: iPhone, iPad, Mac, web and widget

One app on all Apple devices, a web version in the browser and a widget on your phone's home screen. Your FIAP, PSA and GPU overview is always within reach.

# Checklists: see exactly what's left

The app knows FIAP and PSA rules down to the last detail. Requirements differ for each distinction and the checklist adjusts precisely to the one you're aiming for.

## FIAP Checklist per artwork

Sleduje tituly **AFIAP** · **EFIAP** · **EFIAP/b** · **EFIAP/s** · **EFIAP/g** · **EFIAP/p**. Each distinction has different requirements for acceptances, countries and artworks, and the app sets the conditions precisely according to the rules for whichever one you currently qualify for.

- ✓ Each artwork separately: name, acceptance count and country count
- ✓ You immediately see whether the artwork meets the requirement or not
- ✓ Sorted from most successful artwork
- ✓ Direct link to certificate or photograph right from the checklist
- ✓ Each of the five main works must have at least 3 acceptances in 5 countries — the app tracks this automatically

### What you see in practice

"Sacrifice yourself" – 7 akceptací · 6 zemí · ✓  
 "Discovery" – 4 akceptace · 3 země · ✗ chybí 2 země  
 "Safety" – 2 akceptace · 2 země · ✗ chybí akceptace i země

## PSA Checklist Stars per divizi

Sleduje cestu od **QPSA** přes **PPSA**, **EPSA**, **MPSA** až po **GMPSA/P**. In each of the eight divisions you know exactly which star you're on and what you need for the next one.

- ✓ QPSA progress: total acceptances from all divisions (target: 54)
- ✓ Eight Star Paths tracked separately: PIDC · PIDM · ND · PTD · PJD · PPDC · PPDM · 3DD
- ✓ For each division you see the achieved star and what remains to the next
- ✓ Explanation of each division right in the checklist

### Package suggestions

The app suggests the most efficient combination: which Star Paths to certify at once for maximum coverage with minimum star count.

### SRD requirement

PSA requires acceptances to come from PSA-recognised sections. The app alerts you to this; everyone verifies it themselves via the PSA system.

# Where SalonFlow runs

Native app for the entire Apple ecosystem, web version available anywhere without installation.

## IPHONE & IPAD

- ✓ iOS / iPadOS 15 and later
- ✓ Full functionality without restrictions
- ✓ Data is stored locally and always available
- ✓ Home screen widget (FIAP, PSA, GPU, deadlines)
- ✓ Push notifications — entry deadlines, check reminders
- ✓ Deep links for direct access to specific sections
- ✓ Native result sharing via system share sheet

## MAC (CATALYST)

- ✓ The same app adapted for Mac
- ✓ Custom tab bar at the bottom with blur effect and pill indicator
- ✓ Adjustable window and panel sizes
- ✓ Native file dialog for opening files from Finder
- ✓ Keyboard shortcut support

## SALONFLOW LIGHT (WEB)

- ✓ Access from any browser, no installation
- ✓ Available at [salonflow.art/sf-light](https://salonflow.art/sf-light)
- ✓ Dark elegant design with custom cursor
- ✓ Fully responsive SPA (Single Page Application)
- ✓ Data sync with the iOS app

## WHERE DATA IS STORED

### Your data belongs to you

All salons, results, photographs and attachments are stored directly on your device. Login credentials are encrypted. Web sync is optional and never mandatory.

### Download SalonFlow free

Available for iPhone, iPad and Mac on the Apple App Store.

# Getting started

From download to your first entry — or explore everything in demo mode without entering your own data first.

## 1 Download the app for free

[App Store](#) → iPhone, iPad or Mac. No registration on launch.

## 2 App guide in 19 steps

Launches automatically on first opening and takes you through everything essential: patronages, circuit salons, competition photos, dashboard, goals, search and backup. You can relaunch the guide any time via Settings.

## 3 Demo mode: explore risk-free

17 pre-prepared salons cover all scenarios: circuit salons, various patronages, lifecycle phases and countries. Your real data remains untouched throughout.

## 4 Create your first salon

Name, country (ISO code), deadline, patronage organisation. The app takes care of the rest.

## 5 Enter results as you go

After each salon you add the results — progress toward distinctions recalculates instantly.

### Demo mode — details

17 pre-prepared salons covering all scenarios — circuit, various organisations, various results, various lifecycle phases. Salons J–Q are specially designed to demonstrate the path to AFIAP: 75 acceptances, 16 countries, 20 artworks. Your real data remains untouched.

### Two ways to get started

On first launch you choose: go through the app guide (recommended — 19 steps, everything explained) or immediately enable Demo mode and explore with prepared data. You can always return to the guide via Settings.

### Backup from the very start

As soon as you create your first salon, start backing up — export the entire database as a JSON file to iCloud, email or anywhere you like.

# Years of results — without retyping

Have a history in FIAP Dossier or PSA Stars? Import it in one step and the app recalculates everything instantly.

## WHAT CAN BE IMPORTED

### FIAP Dossier CSV

FIAP

Export file from the FIAP Dossier system. Import recognises artwork name, section, salon, country, year, status and result. Historical data is immediately reflected in FIAP calculations.

### PSA Stars CSV

PSA

File from the PSA Stars database. Acceptances and awards per division are imported. Stars and Galaxy points recalculate from all historical and new data combined.

### GPU import

GPU

Historical GPU data for calculating Crown levels.

### Templates to download

In Settings → Import you can download sample CSV templates with column descriptions — for manual filling.

## WHAT IT DOES FOR YOU

- ✓ Historical data immediately becomes part of your career
- ✓ Distinctions, progress bars and checklists recalculate from everything at once
- ✓ Every import can be undone at any time — data reverts to its previous state
- ✓ A clear overview of what was imported and when

## IMPORT ALSO WORKS ON WEB

- ✓ FIAP Dossier and PSA Stars can be imported via SalonFlow Light in the browser
- ✓ Data is immediately visible in the overview — no waiting
- ✓ Web import is immediately reflected in the SalonFlow Light overview

### Everything recalculates after import

Distinctions, progress bars, checklists, competition photos — everything takes historical and new data into account at once. You see your complete career from the first salon.

# Your full career at a glance

Five customisable cards — you set the order and the app remembers it. Plus two smart cards that appear automatically and disappear once you meet the condition.

## 5 CUSTOMISABLE CARDS

### Profile

Name, achieved distinctions (FIAP, PSA, GPU), photography club. Career calling card.

### Competition photos

Overview of your competition photos, their status, acceptance count and approaching limits.

### Metrics and summary

Progress bars toward the next FIAP, PSA and GPU distinctions. Tap to open a detailed checklist with a precise overview of what remains.

### Overviews and reports

Award breakdown, country statistics, print overview for FIAP. Everything you need for a distinction application.

### 17 Upcoming judging completion

Entry deadlines, results dates, catalogue dispatch — sorted chronologically.

## 2 SMART INFO CARDS

### SalonFlow Light

Appears if you haven't set up sync yet and have at least one result. Explains what Light Sync does, shows FIAP/PSA/GPU counts and offers a CTA. Disappears after linking. Can be snoozed for 30 days.

### Public portfolio

Appears if you have a name in your profile but no published portfolio yet. Explains the difference between sync and portfolio. Disappears after publishing. Can be snoozed for 30 days.

## BACKUP

### Backup reminder

The dashboard gently reminds you to back up once every 30 days. The cooldown ensures it doesn't bother you repeatedly.

### Customisable card order

Long-press a card to drag it to a new position. Saved automatically.

# Every salon from start to finish

SalonFlow tracks every salon through its full lifecycle — from first entry to final archiving. Nothing slips through.

## 6 SALON MILESTONES

- Entry deadline**  
Date by which photographs can be submitted. A notification arrives five and one day before the deadline.
- Judging completed**  
The jury has finished and results will arrive soon.
- Results announced**  
Date when the results email arrived.
- Ocenění odesláno**  
Medals and certificates are on their way by post.
- Gallery published**  
The salon's online gallery is available to the public.
- Catalogue published**  
The printed or PDF catalogue is available.

## 7 LIFECYCLE STATUSES

- Wishlist
- Announced
- Entries open
- Judging
- Results
- Awards dispatched
- Closed

## OTHER SALON PROPERTIES

- ✓ Webová stránka salonu (přímý odkaz)
- ✓ Fee paid – clearly recorded
- ✓ Status confirmed – you know everything is in order
- ✓ Přílohy k salonu: PDF podmínky, katalog nebo cokoli dalšího
- ✓ Salon trash: soft deletion with restore option
- ✓ Share salon results as a card via AirDrop, messages or social networks

## LOGIN CREDENTIALS

### Secure storage

Username and password for the salon system stored in iOS Keychain (encrypted, not transferred to new devices, not in backup).

# Multi-jury competitions

A circuit salon groups multiple juries or selections under one name — each with its own FIAP/PSA/GPU code and potentially from a different country. SalonFlow fully supports this.

## CO JE CIRCUITSECTION

- ✓ Each section/jury is a separate circuit section
- ✓ Custom label (jury or section name)
- ✓ Custom FIAP patronage code (e.g. 2026/065)
- ✓ Custom PSA patronage code
- ✓ Custom GPU patronage code
- ✓ Custom codes for other orgs (IAAP, ICS, RPS, UPI, ISF...) in format "ORGNOME 2026/181"
- ✓ Custom country ISO code (if different from the main salon)

## HOW RESULTS ARE ENTERED

- ✓ When adding a result you select the section/jury
- ✓ Acceptances are automatically assigned to the correct country
- ✓ Different juries = different countries = different FIAP points by country
- ✓ The jury's PSA code determines the division for Stars calculation

## CUSTOM PATRONAGE ORGANISATIONS

### Beyond FIAP/PSA/GPU

A salon can have patronage from any organisation — IAAP, ICS, RPS, UPI, ISF, IUP, PPA and others. The app displays their codes on every result and counts them in reports.

## CIRCUIT VS. SINGLE DETECTION

- ✓ You mark a salon as circuit when creating or editing it
- ✓ Circuit salons are automatically detected in FIAP catalogue search (section count > 1)
- ✓ Clearly distinguished by icon in the salon list

# Every detail in its place

A result in SalonFlow isn't just a number in a table. It's a complete record linked to a photograph, attachments and history.

## WHAT YOU RECORD FOR EACH RESULT

### Artwork title

Title of the photograph that was entered in the salon.

### Sekce

Free text or quick chip (PSA: PIDC, PIDM, ND, PTD, PJD, PPDC, PPDM, 3DD).

### Status

Accepted or Awarded.

### Organizace

FIAP, PSA, GPU, Salon or Other.

### Award name

Gold Medal, HM, Best of Show and similar.

### Datum & print

Decision date and print section flag.

## ATTACHMENTS DIRECTLY ON THE RESULT

- ✓ Certificate — scanned PDF or photo of the diploma
- ✓ Photograph of the physical medal or award at the ceremony
- ✓ Reference photograph of the artwork for quick identification
- ✓ Jury or section for circuit salons

### Everything linked in competition photos

For every photograph in competition photos you see the complete history: which salons it competed in, certificates and medal photos from individual results. All in one place, linked to the specific artwork.

### ★ Select photo from competition photos

Artwork title se doplní automaticky a fotka se k výsledku přiřadí. Nemůže se stát, že by se stejně pojmenovaná fotka zaměnila za jinou — každé dílo je propojeno konkrétním snímkem, ne jen názvem. When entering a result you select the photograph directly from your competition photos. The artwork title fills in automatically and the photo is linked to the result. There's no risk of a similarly-named photo being confused with another — every artwork is linked by the specific image, not just the name.

## RESULTS TRASH

### Soft deletion

Swipe to move a result to the trash. With one gesture restore it to its exact original position or delete permanently.

## PSA DIVISIONS ARE COLOUR-CODED

Each division has its own colour for quick orientation:

PIDC PIDM ND PTD PJD PPDC PPDM 3DD

# Your profile and public portfolio

In the Profile tab you fill in your card. Then with one step you decide what will be public on salonflow.art.

## WHAT THE PROFILE CONTAINS

- ✓ Full name of the photographer
- ✓ FIAP, PSA and GPU distinctions
- ✓ Photography club or organisation
- ✓ Contact email, phone and address
- ✓ Personal website
- ✓ Až 8 sociálních sítí: Instagram, Facebook, Twitter/X, YouTube, Vimeo, Behance, Flickr a obecný odkaz
- ✓ Scanned distinction certificates for FIAP, PSA or GPU
- ✓ Profile photograph
- ✓ Up to 9 photographs for the portfolio gallery

### Achieved distinctions calculate automatically

The distinctions you qualify for based on your results are automatically shown on your public portfolio page. No manual entry required.

## HOW TO CREATE A PUBLIC PORTFOLIO

- 1 Fill in your profile in the app**  
Name, distinctions, contact, photographs.
- 2 Choose what will be public**  
You decide what from your profile and statistics you want to make public.
- 3 Submit for approval**  
The portfolio goes through a short review and then goes live at salonflow.art/portfolio.

### What a visitor to your page sees

Name, distinctions, club, contact, social networks, photo gallery with lightbox, achieved FIAP and PSA distinctions and optionally results statistics. All in an elegant design.

### Free for all Light users

Public portfolio does not require PRO. All you need is SalonFlow Light and a completed profile.

FIAP

# Fédération Internationale de l'Art Photographique

Two parallel systems — acceptance-based distinctions (Category A) and prestigious Diamond distinctions for awards (Category B). The app calculates both simultaneously.

## CATEGORY A — ACCEPTANCES

DISTINCTION	ACCEPTANCES	COUNTRIES	ARTWORKS
AFIAP	75	15	20
EFIAP	200	20	40
EFIAP/b	400	25	80
EFIAP/s	600	30	130
EFIAP/g	900	35	200
EFIAP/p	1200	40	300

### Per-work requirement

Each of the five main works must have at least three acceptances in five different countries. The app tracks this in the checklist.

### FIAP print requirements

Higher FIAP distinctions require a certain number of acceptances in print sections. Optional condition, configurable in the rules.

## CATEGORY B — DIAMOND DISTINCTIONS

DISTINCTION	AWARDS	COUNTRIES	ARTWORKS
EFIAP/d1	50	10	15
EFIAP/d2	100	15	30
EFIAP/d3	200	20	60
EFIAP/d4	350	25	100
EFIAP/d5	500	30	150
EFIAP/d6	650	35	200
EFIAP/d7	800	40	250
EFIAP/d8	950	45	300

### Diamond Mode

After achieving EFIAP/p you can enable Diamond Mode — it filters only awards received after the EFIAP/p certificate date. Max. 10 awards per photograph (FIAP 047/2025). The app applies this cap automatically.

PSA

# Photographic Society of America

Three parallel systems: overall ROPA distinction, stars per division and Galaxy points. The app tracks everything at once and automatically assigns divisions from the result section.

## ROPA DISTINCTIONS (TOTAL ACCEPTANCES)

DISTINCTION	ACCEPTANCES
QPSA	54
PPSA	288
EPSA	700
MPSA	1 500
MPSA2	2 250
GMPSA	3 000
GMPSA/B	5 000
GMPSA/S	7 000
GMPSA/G	9 000
GMPSA/P	11 000

## PSA STARS — 8 DIVISIONS, 5 STARS + GALAXY

Eight divisions: PIDC · PIDM · ND · PTD · PJD · PPDC · PPDM · 3DD

STAR	ACCEPTANCES	TITLES
★1	18	6
★2	36	12
★3	72	24
★4	144	48
★5	288	96

### Galaxy (after ★5)

G1–G5: 75/150/225/300/375 points (25 photos, max 3/photo). G6–G10: 525/675/825/975/1125 points (50 photos, max 3/photo). The app calculates from the same results, per division.

GPU

# Global Photographic Union

Point system: results convert to points and GPU salons give double. Five Crown levels for your entire photography career.

## GPU CROWN LEVELS

DISTINCTION	POINTS
GPU Crown 1	200
GPU Crown 2	600
GPU Crown 3	2 500
GPU Crown 4	6 000
GPU Crown 5	15 000

## POINT SYSTEM

RESULT	REGULAR SALON	GPU SALON
Acceptance	1 point	2 points
HM / Certificate	2 points	4 points
Medal / Trophy	4 points	8 points
Unknown award	4 points	8 points

## GPU SALONS — DOUBLE POINTS

### You recognise them when creating a salon

When creating a salon you mark the GPU patronage and from that point the app automatically counts double points for every result.

### Points are calculated continuously

Add a result and points are added immediately. The app considers all salons at once and always shows the current Crown level.

# Competition photos

A visual library of all photographs that are competing or will compete. Every artwork has its history, stats and attachments in one place.

## WHAT YOU SEE FOR EACH PHOTOGRAPH

- ✓ Which salons the photograph competed in and with what result
- ✓ FIAP acceptance count with a warning as the limit of ten approaches
- ✓ PSA and GPU acceptance and award counts
- ✓ Certificates and photos of physical medals from individual results
- ✓ When and where it last competed
- ✓ A photograph can be manually excluded from PSA tracking

### Photographs can be added in advance

You don't have to wait for salon results. Upload photographs to the library anytime in advance and prepare them for future entries. When entering a result you then select the specific image and everything links automatically.

### Same photo twice?

The app recognises it by name and file content and merges it into a single entry. No duplicates.

## FILTERS

- All
- Active
- Near FIAP limit
- FIAP retired
- Near PSA limit
- PSA retired
- PSA excluded

## SORTING

- ✓ By latest entry
- ✓ By name (A-Z)
- ✓ Most FIAP acceptances
- ✓ Most PSA acceptances
- ✓ Most awards

### Results without an uploaded photo

If you have salon results but haven't uploaded the photo yet, statistics calculate correctly and you can add the photo any time later.

# Every success deserves its moment

The app knows when you achieve a distinction or win a medal — and celebrates with you. Automatically, no setup required.

## FIVE CELEBRATION LEVELS

### FIAP, PSA or GPU distinction

The biggest celebration for the biggest moment of your career.

### Gold medal

A celebration worthy of gold.

### Silver medal

Every silver deserves its moment.

### Bronze medal

Bronze isn't luck. The app knows it.

### Honourable mention

A genuine celebration for HM too.

### The app recognises it automatically

No setup needed. You enter a result and the app decides whether and how to celebrate. Each distinction is celebrated just once — at the right moment.

### Entering multiple results at once?

No problem. The app picks the most significant one and celebrates exactly that.

### Works anywhere, without internet

Celebrations are built into the app — no servers, no loading. They work always and everywhere.

# Find your next salon

A salon catalogue right in the app, continuously updated and neatly filtered. Find your next salon without browsing the web.

## WHAT YOU'LL FIND IN THE CATALOGUE

- ✓ FIAP-accredited salons from around the world
- ✓ PSA-accredited competitions
- ✓ Name, country, deadline, results date
- ✓ Patronage organisations (FIAP, PSA, GPU...)
- ✓ Website and organiser contact
- ✓ Circuit salons clearly marked
- ✓ Catalogue available even without internet connection

## HOW YOU SEARCH

- ✓ Text search in salon names
- ✓ Filter by organisation — FIAP, PSA or all
- ✓ Filter by country
- ✓ Filter "new countries only" — where you don't have a salon yet
- ✓ Sort: deadline, country, circuit
- ✓ Remove active filters with a single tap

## WISHLIST AND QUICK ADD

### Caught your eye?

Add it to your Wishlist with one tap. When you're ready to enter, open it and the basic details are already filled in — nothing to retype.

### Free version

In the Free version you see the first five results. PRO version shows everything without limits and also unlocks the Wishlist.

### The catalogue is continuously updated

The search content is regularly updated — always a current overview of salons for the upcoming season.

# Everything you need to apply for a distinction

PDF reports, data backup, sharing results, printing overviews — all in Settings → Export.

## PDF EXPORTS (PRO ONLY)

### FIAP acceptance list

FIAP

Complete list for a FIAP distinction application — salons, sections, countries, counts.

### PSA Stars overview

PSA

Per-division for PSA Star certification.

### GPU Crown overview

GPU

Points and Crown levels in a clear format.

### Portfolio PDF

Comprehensive photographer portfolio — profile, distinctions, salons, results in one document.

### Print results overview

A separate overview of all results in print sections — useful when preparing a FIAP distinction application where prints are tracked separately.

### PDF exports are a tool, not a finished application

Exports give you clear reference material. Official applications for FIAP, PSA or GPU distinctions are filled in by you directly on the respective organisations' websites.

## DATA BACKUP

- ✓ The entire salon and results database is saved to a single file
- ✓ Save it anywhere: iCloud, AirDrop, email or Files
- ✓ Restore from backup with a single tap
- ✓ The dashboard will remind you to back up once every thirty days

## SHARING SALON RESULTS

### Salon Share Card

An elegant card with the results of a specific salon — name, acceptance and award counts, patronage organisations. Sharing via the system sheet (AirDrop, Instagram Stories, messages, anything).

## IN-APP REPORTS

- ✓ Breakdown of awards (gold, silver, bronze, HM, other)
- ✓ Country statistics — how many acceptances from each country
- ✓ Print vs. digital overview
- ✓ Closed salons — separate filtered overview

# Web version — available anywhere

SalonFlow Light is a web application available at salonflow.art. Nothing to install, works in any browser.

## 4 MAIN VIEWS

### Dashboard

FIAP/PSA/GPU statistics, progress bars to distinctions, goals. Global announcements from admin. Trial countdown banner.

### Salony

List of all salons synced from iOS. Click to open detail with results. Read-only if the account is managed by iOS.

### Profil (portfolio)

Edit profile, upload photos, submit portfolio for approval.

### Účet

Manage subscription, import CSV, delete account, settings.

## ACCESS AND SECURITY

- ✓ Login with email and password
- ✓ 28 days free after registration — no credit card
- ✓ Forgotten password reset by email
- ✓ Deleting your account erases all your data
- ✓ GDPR — consent recorded at registration

## DATA INTEGRITY

### Your data is safe

SalonFlow Light actively monitors data quality in the system and alerts to unusual activity.

## PLAN SYSTEM

Ambassador	∞

# iOS ↔ Web · Public portfolio

The iOS app is always the primary data source. Sync is one-way — from iOS to web. On the web you can view and check your data, but editing always happens in the app. Portfolio is an optional separate step.

## PAIRING IOS WITH WEB

- 1 Enter your email in the app**  
In Settings → SalonFlow Light.
- 2 A link email arrives**  
Tap the link, the app opens and pairing completes automatically.
- 3 Web account is created automatically**  
If you don't have a web account yet, the first sync creates one automatically. No need to register anywhere.
- 4 From that point it runs itself**  
Data syncs automatically in the background. Nothing to think about.

### What is synchronised

Text data: salons, results and awards. Photographs, certificates and attachments remain private on your device.

## PUBLIC PORTFOLIO

- ✓ Your own public page at [salonflow.art/portfolio](https://salonflow.art/portfolio)
- ✓ Name, distinctions, photography club, contact
- ✓ Up to 8 social networks (Instagram, Facebook, YouTube...)
- ✓ Profile photo and up to 9 photographs in the gallery
- ✓ Results statistics — show only what you choose
- ✓ Achieved distinctions calculated automatically
- ✓ Elegant gallery with browsing capability
- ✓ After submission it goes through a short review — then it's live
- ✓ Free for all SalonFlow Light users

### Photographer directory

Overview of all public photographer profiles using SalonFlow. [salonflow.art/portfolio](https://salonflow.art/portfolio) →

# Start free — upgrade whenever you want

SalonFlow is free to download and fully functional for your first two salons. PRO unlocks everything without limits. SalonFlow Light is available separately or as an add-on to the iOS app.

## FREE

### Zdarma

Forever · No credit card

- ✓ Up to 2 salons
- ✓ Unlimited results
- ✓ FIAP/PSA/GPU calculations
- ✓ Demo mode + guide
- ✓ Widget
- ✓ 5 search results
- ✓ Competition photos (basic)

## PRO

### Annual subscription

[Stáhnout na App Store →](#)

- ✓ Unlimited salons
- ✓ Full catalogue search + Wishlist
- ✓ PDF export for FIAP, PSA and GPU
- ✓ Portfolio PDF with full career
- ✓ Attachments to salons and results
- ✓ Competition photos in full
- ✓ FIAP and PSA checklists
- ✓ Share results as a card
- ✓ Trash for results and salons
- ✓ Import historical data (FIAP, PSA, GPU)
- ✓ SalonFlow Light free (backup and overview)

## SALONFLOW LIGHT

### Annual subscription

[Vyzkoušet zdarma na salonflow.art](https://salonflow.art)  
→

- ✓ Web dashboard
- ✓ Sync with iOS app
- ✓ Public portfolio
- ✓ Import historical data
- ✓ Available from browser
- ✓ Standalone or with iOS PRO

#### ★ iOS PRO includes Light access for free

iOS PRO users can access SalonFlow Light for free via sync. A web account is created automatically on the first sync. On the web you can view your data, check it and publish your portfolio — but iOS always remains the primary source. Data is always entered in the app; the web serves as backup and overview.

#### Public portfolio for free

Portfolio on salonflow.art doesn't require paid Light or PRO — available to anyone with a SalonFlow Light account.

#### Ambassador programme

Active photographers and advocates can apply for Ambassador status with unlimited access. [salonflow.art/ambassador](https://salonflow.art/ambassador) →

# Salon Flow

"Keep your art and your story together"

SalonFlow is not a product of any photography organisation or association. It grew from the personal need of an active competition photographer who got tired of tracking results in spreadsheets. Everything in the app comes from real competition photography experience.

## TVOJE DATA JSOU V BEZPEČÍ

-  Salons and results are stored directly on your device, not in the cloud.
-  Photographs, certificates and attachments never leave your device.
-  Salon passwords are encrypted in iOS Keychain and are not part of the backup.
-  Web sync is optional. Without it the app works fully offline.
-  No ads, no sharing data with third parties.
-  We collect no data. The content you create belongs exclusively to you.
